  <h1>About StrongPasswordGenerator.dev</h1>
  <p>
    StrongPasswordGenerator.dev was created to make good password habits easier for
    everyday people. Many security tools focus on experts;
    this site focuses on clear language, privacy-friendly design, and practical steps you
    can actually follow.
  </p>

<section>
  <h2>Our Approach</h2>
  <ul>
    <li><strong>Local-first:</strong> Passwords and passphrases are generated in your
      browser, not on our servers.</li>
    <li><strong>Simple tools:</strong> We aim for straightforward, understandable
      generators instead of overly complex interfaces.</li>
    <li><strong>Educational guides:</strong> Tools matter more when paired with
      simple, honest explanations and checklists.</li>
  </ul>

<section>
  <h2>Who This Site Is For</h2>
  <p>
    This site is for anyone who wants to improve their online security without memorizing
    technical jargon. Whether you are setting up
    your first password manager or cleaning up years of old accounts, the goal is to give
    you clear, concrete help.
